WIC - Women Infants Children Grant  
FPSP - Family Planning Special Project  
SHIP - Statewide Health Improvement Program
Flint: Could it Happen Here?

Annual Interactive Video Conference for All Local Elected Officials
Tuesday, May 3, 2016 12:00 – 1:30 PM

ABOUT THIS VIDEOCONFERENCE

All Elected Officials: RSVP to CHS Administrator/Public Health Director by April 25.

Local elected officials are invited to participate in a discussion about their role in protecting the water and health of their communities by joining this interactive video conference led by Commissioner of Health, Edward Ehlinger, and State Community Health Services Advisory Committee (SCHSAC) Chair Doug Huebsch, Otter Tail County Commissioner.

FEATURED PRESENTATION

The tragic exposure to lead in drinking water in Flint, Michigan, has dominated recent news headlines. Could that happen here in Minnesota? How does the Safe Drinking Water Act protect against lead? What strategies does the Minnesota Department of Health (MDH) use to safeguard against lead? On the ground, from a local water utility’s perspective, what steps are taken to prevent exposure now and reduce the potential for lead exposure in the future?

Anna Schliep, MDH, and Jim Bode, St. Paul Regional Water Services, will present and answer questions.

HOW TO PARTICIPATE

SCHSAC Members, along with CHS Administrators and Public Health Directors, host this event at local interactive video conference sites around the state. You can also participate from the Freeman Building, St. Paul. RSVP by April 25 to your CHS Administrator or Public Health Director.

- Local Elected Officials: RSVP by April 25 to your CHS administrator or public health director
- CHS Administrators and PHN Directors: Register your location to participate in this videoconference and host participants: www.health.state.mn.us/divs/opi/cd/training/phupdate/

Goal: Obesity Prevention (what we care about)

How: Pilot referral process between health care and community educ. org. by April 1, 2016.

Objectives:
(Where do we want to be?)

- 200 vouchers will be issued from health care clinics to interested participants between now and April 2016
- 100 vouchers will be redeemed at community education organization between now and April 1, 2016
- Evaluation surveys will be given to 100% of participants who redeem their vouchers at community education organizations between now and April 1, 2016
- 50% of completed surveys will be returned to the community education organization between now and April 1, 2016.
- 50% of completed survey results indicate that participants started to eat healthier or started being physically active between now and April 1, 2016.

How will we know?

**KEY:**
Q1= Jan. to March
Q2= April to June
Q3= July to Sept.
Q4= Oct. to Dec.

WIC is a nutrition and breastfeeding program that helps young families eat well and be healthy. (what we care about)
Overall Strengths:

1. MMS does a good job of disseminating information about Public Health and its benefits to the community.
2. MMS has developed strong partnerships within the community that promotes collaboration and support of the public health system.
3. It is evident that MMS has a strong, visionary leadership and the passion for public health. The drive to step forward and be a leader in the state is commendable.
4. The 3 counties work together well. It is evident that there is a team atmosphere and everyone works for the benefit of the community.
5. MMS has a strong preparedness infrastructure that provides benefits to the Department and the community beyond public health preparedness.

Three most serious challenges or opportunities for improvement:

1. There is an opportunity for better documentation. More detailed minutes, including dates, will provide better evidence of discussions and actions that have taken place.
2. For services that are not provided by the Department or there is not direct control over, there needs to be evidence of communication with the entity and a role at the local level.
3. All staff would benefit from being educated and having input on all plans such as CHA/CHIP and strategic plan as well as knowledge of how the plans connect to each other. These plans should be the driving force of how MMS operates.
4. The collection and analysis of primary data is limited in depth. It lacks a functional system.
5. There is an opportunity to engage the Community Health Board and expand their role in the development of plans, policies, and agency decisions.

Overall impression of the department as a functioning health department:

The three health departments have solidified their relationship together to function as a unified staff. In addition, MMS is viewed as a model for the state of Minnesota in establishing multi-county jurisdictions. MMS has done a great job putting aside jurisdictional differences to improve the health of the community. Their relationships with community partners to leverage external resources help to further its mission into the community.
